

A complete agronomic farming solution

Look to John Deere to provide the complete agronomic farming solution for your property. Start with a 9030 Series Scraper Tractor to level the land, then team up a 1700 MaxEmerge Plus Planter with an 8030 Series Tractor for the most accurate seed placement, follow this with a John Deere Self-Propelled Sprayer that provides the ultimate in precision application.

“For customers on farm sites who need big horsepower for low-cost land-levelling or scraping of terrain, the 9430, 9530 and 9630 Tractors can be ordered in a special scraper configuration,” explains Royce Bell, Tactical Segment Manager, John Deere Limited. “These tractors are specifically engineered to handle the rigorous performance requirements for moving earth with a pull-pan, and are designed for this application.”

As all farmers know, seed placement is critical for uniform emergence and you only have one chance to get it right. The early growth period of any plant can determine the outcome at the end of the season. That’s why it’s important to have planting equipment that provides accurate seed placement to give you the best possible result. The John Deere 1700 or 1720 MaxEmerge Plus Planters coupled with the most fuel efficient tractor in the world, the John Deere 8430, provides you with the ideal planting experience.

John Deere’s latest line-up of Self-Propelled Sprayers sets new standards for sprayer performance, versatility and productivity with service backed up by an extensive John Deere Dealer network.

“We’ve put together a complete family of self-pro-

A John Deere self-propelled sprayer.

pelled sprayers to meet the productivity demands of all markets, from growers to commercial applicators,” says Royce. “All the sprayers are loaded with integrated performance-enhancing technology which includes precision guidance, mapping and variable rate software. These machines truly are the most efficient sprayers ever built by John Deere.”

John Deere can also offer these products as a complete Controlled Traffic Farming solution. There are sev-

A 1720 MaxEmerge Plus planter coupled with a 8530 tractor.

eral benefits associated with Controlled Traffic Farming. Continually following 'traffic lanes' reduces overall compaction. With less compaction, the soil has better water infiltration, root development, and fertiliser uptake.

In some drier areas, CTF could provide better water management. In wet conditions, running equipment on the 'tracks' that are already compacted — gives a firm path for the equipment. This may allow operating

sooner in wet conditions, widening the window of opportunity to perform field work.

The John Deere 7030 Large-Frame and 8030 Series Wheel Tractors are perfectly suited to CTF systems. With wheel track widths from 1.6 metres to the factory approved 3.0 metre spacing, there's a system to match any farm.

EXCEL Agriculture

Excellent product. Excellent service.

+ the way forward

Fertiliser Rigs

- ✓ Up to 3 tonne capacity with exceptional stability and ease of lifting
- ✓ New low draft shank and clamp assembly for simplistic reliable operation
- ✓ Offering an unrivalled 770mm of underframe clearance for brilliant trash flow
- ✓ Proven stainless steel metering units for corrosion resistance
- ✓ Variable rate technology available
- ✓ Can apply gas at same time as fertilisers

Stubble Warrior

- ✓ Plant wheat back into cotton hills
- ✓ Double disc
- ✓ Single disc

Excel Penetrator

- ✓ 4, 6, 8 row
- ✓ Side busting/centre busting capabilities
- ✓ Adaptable for gassing, dry fertiliser using Excel's new rig mounted fertiliser boxes
- ✓ 5/8" inline shear bolts
- ✓ Unrivalled trash clearance

Excel Cultivator

Cultipacker

- ✓ Machine can be pulled one way for aggressive soil breakdown and the other way for refining the soil before planting

Also available:

- ✓ Module Builder
- ✓ Rubber Tyred Roller
- ✓ Lilleston Rig
- ✓ Millenium Planter
- ✓ Stubble Warrior Planter
- ✓ Parallelogram Cultivators
- ✓ Guess Row Averagers
- ✓ Listering Rigs
